MAIN FEATURES

FMPLOYMENT

States' trend series comparisons

The Australian and State *trend series* comparisons are given on page 25. There was an increase of 2.4% in Tasmania's employment over the year to September 1995. The largest percentage increase in employment was in Queensland (4.3%). The next highest percentage increase in employment was in New South Wales (4.1%), followed by Victoria (3.6%) and Western Australia (3.5%). South Australia had an increase in employment of 2.1%.

Tasmania

Regional Tasmania's original series figures

In the Hobart and Southern Statistical Division the estimate of unadjusted employment increased by 3,400 between September 1994 and September 1995 to 101,600. Employment in the Northern Statistical Division increased by 3,100 between September 1994 and September 1995 to 56,900. The estimate of employment in the Mersey-Lyell Statistical Division was 42,700 in September 1995, a decrease of 1,200 on the figure for September 1994. (See tables 3–8, pages 2–7.)

UNEMPLOYMENT

Tasmania's trend series figures

The Tasmanian provisional trend series estimate of 20,500 unemployed persons in September 1995 was a decrease of 2,800 on the figure for September 1994 of 23,300. The estimate of the unemployment rate of 9.3% in September 1995 compared with 10.7% in September 1994. (See tables 3–8, pages 2–7.)

THE LABOUR FORCE

Tasmania's trend series figures

In September 1995 there was an *unadjusted* estimate of 367,500 civilian Tasmanians aged 15 or more. There were an estimated 220,000 persons (based on *trend series* estimates) in the labour force. The estimate of the labour force participation rate in September 1995 was 59.9%, compared with the figure of 59.6% in September 1994.

For males, the estimate of the participation rate was 69.8%, compared with 71.1% for September 1994. For females, the estimate of the participation rate was 50.2%, compared with 48.4% in September 1994. (See table 3, page 2.)

Tasmania

EMPLOYED WAGE AND SALARY EARNERS

In December 1994 there were approximately 138,000 employed wage and salary earners in Tasmania. In December 1992 the figure was 143,400 employed wage and salary earners.

In November 1994 the Tasmanian public sector accounted for 33.4% of all employed wage and salary earners. Overall, the category Community services had the highest industry representation, 30.6%, compared with the equivalent figure of 27.0% recorded in November 1992. The next highest industry grouping was Wholesale trade and Retail trade (18.4%, compared with 20.1% in November 1992) and Manufacturing (14.2%, compared with 14.8% in November 1992).

In November 1994, women made up 48.3% of employed wage and salary earners. In November 1992, the equivalent figure was 45.9%. (See table 9, page 8.)

AWARD RATES OF PAY INDEXES

The annual movement from August 1994 to August 1995 of weekly award rates of pay indexes for Tasmania rose by 1.4% for full-time adult females and by 1.6% for full-time adult males, for a combined annual increase of 1.6%. For Australia, the figures were 1.4% for females and 1.2% for males, for a combined annual increase of 1.2%.

For full-time adult female employees in Tasmania, the largest industry increases over this twelve-month period occurred in the Recreation, personal and other services industry (3.1%); and the Public administration and defence industry (2.6%).

For the same period for full-time adult male employees in Tasmania, the largest industry increases occurred in the Community services industry (4.0%); and the Electricity, gas and water industry (2.2%).

The largest occupation increase over the same period for full-time adult female employees occurred in Para-professionals (2.6%); and Salespersons and personal service workers (2.0%).

For full-time adult male employees the largest occupation increases over the period occurred in Plant and machine operators, and drivers (3.1%); and Managers and administrators (2.3%). (See table 14, page 10.)

BUILDING MATERIAL PRICES

Prices for house building materials in Hobart increased by 4.6% over the twelve-month period ending August 1995, which was the highest rise for all capital cities. The national increase was 1.8% with Adelaide recording the lowest increase at 0.1%.

Prices for building materials used in building other than house building increased in Hobart by 3.6% in the year ended August 1995. The national increase was 2.9%, with Perth recording the largest increase at 3.7%; Hobart and Brisbane followed at 3.6%, with Melbourne recording the lowest increase at 2.4%.

Major contributors to the annual movement in Hobart were non-ferrous pipes and fittings (up 18.7%), precast concrete products (up 8.0%) and builders' hardware (up 7.0%).

Price Index of Materials Used in House Building, August 1995, ABS Catalogue No. 6408.0, released on 16 October 1995, \$10.00.

Price Index of Materials Used in Building Other Than House Building, August 1995, ABS Catalogue No. 6407.0, released on 16 October 1995, \$13.00.

CONSUMER PRICE INDEX

The Consumer Price Index, All Groups for Hobart increased by 4.5% over the twelve months to September 1995. This compared to the increase for the weighted average of the eight capital cities of 5.1% for the same period.

For the September quarter, the Hobart price index increased by 1.1%, compared to the national average of 1.2%. The highest increase for any capital city was experienced in Sydney, at 1.6% for the quarter, and the lowest in Perth, at 0.6%.

Major contributions to the national increase in the price index over the year ending September were mortgage interest charges (up 25.2%), cigarette and tobacco prices (up 20.0%), hospital and medical services (up 5.7%), and petrol (up 5.1%). Hobart experienced similar rises in all of these categories over the year.

Contributions to the quarterly price index rise in Hobart were made by rises in the prices of hospital and medical services, automotive fuel, and local government rates and charges. Smaller changes also occurred in food prices, with lamb and mutton, and cakes and biscuits becoming more expensive, while fresh fruit became cheaper.

The index of underlying inflation, as defined by the Commonwealth Treasury, increased by 1.2% during the September quarter 1995, resulting in an annual increase of 3.1%.

Consumer Price Index, September quarter 1995, ABS Catalogue No. 6401.0, released on 25 October 1995, \$13.00.

STATE ACCOUNTS

The Tasmanian Gross State Product increased by 1.2% during the June 1995 quarter, as measured by the trend series at current prices. The largest quarterly growth was recorded by the Northern Territory with 2.5%, while the lowest was recorded by the Australian Capital Territory with 0.7%. Tasmania's annual increase (June 1994 to June 1995) was 5.5%. The highest annual increase was 12.8% for the Northern Territory, while the lowest was 4.0% for the Australian Capital Territory.

Tasmanian State Final Demand grew by 0.5% during the June quarter 1995, as measured by the trend series at average 1989-90 prices. Private final consumption was the major contributor to the growth in Tasmanian State Final Demand, growing by 0.8%.

The largest growth in State Final Demand was 2.3% recorded in the Northern Territory, while the lowest was a decrease of 0.7% in the Australian Capital Territory.

State Accounts June Quarter 1995, ABS Catalogue No. 5242.0, released on 13 October 1995, \$29.00.

LIVESTOCK SLAUGHTERING

Trend estimates The August 1995 Tasmanian trend estimate for the slaughtering of cattle and calves was 0.8% higher than that recorded in July 1995. The number of pigs slaughtered in the same period decreased by 2.6% while the number of sheep and lambs slaughtered fell by 2.7%.

> The trend estimate for the slaughtering of sheep and lambs was 67,900 in August 1995, which was 34.1% below the 103,000 recorded in August 1994. The slaughtering of sheep and lambs continued to fall from the highpoint of 103,800 in September 1994.

> The trend estimate of 7,100 pigs slaughtered in August 1995 was 9.0% below the 7,800 slaughtered in August 1994.

> The cattle and calves slaughtering trend estimate continued to increase after a slight increase in the previous month. The number of cattle and calves slaughtered in August 1995 was 19,800, which was 15.1% above the 17,200 recorded in August 1994.

(See table 21, page 16.)

BUILDING APPROVALS

There were 221 new dwelling units approved during August 1995 in Tasmania. This was an increase of 4% on the number recorded for July 1995 (213) but a 24% decrease on the number recorded for August 1994 (291).

For the twelve months ended August 1995 there were 3,006 new dwelling units approved, 25% below the 4,024 units recorded for the twelve months ended August 1994.

The latest monthly trend estimate for the number of dwelling units approved shows twenty-two consecutive months of decline.

The highest number of dwelling units approved in August 1995 was recorded by the City of Hobart with 34, followed by the Municipality of Sorell with 25, the City of Clarence with 21 and the Municipality of Kingborough with 20.

The value of all building approved, at current prices, in August 1995 was \$44.0 million, 50% above the July 1995 figure of \$29.3 million and 14% above the August 1994 figure of \$38.6 million.

(See table 27, page 20.)

RETAIL

The trend estimate for turnover of retail and selected service establishments for August 1995, in Tasmania, was \$238.3 million, an increase of more than 3% on the August 1994 figure of \$230.9 million. The monthly trend growth for Tasmania was 0% for August 1995 after recording growth of 0.3% to 0.9% per month since January 1995.

The trend estimate of turnover for Australia (\$9,917.8 million) for August 1995, was almost 9% higher than for August 1994 (\$9,122.9 million). The trend estimate of retail turnover increased by 0.9% in August 1995, the lowest monthly increase since April 1995.

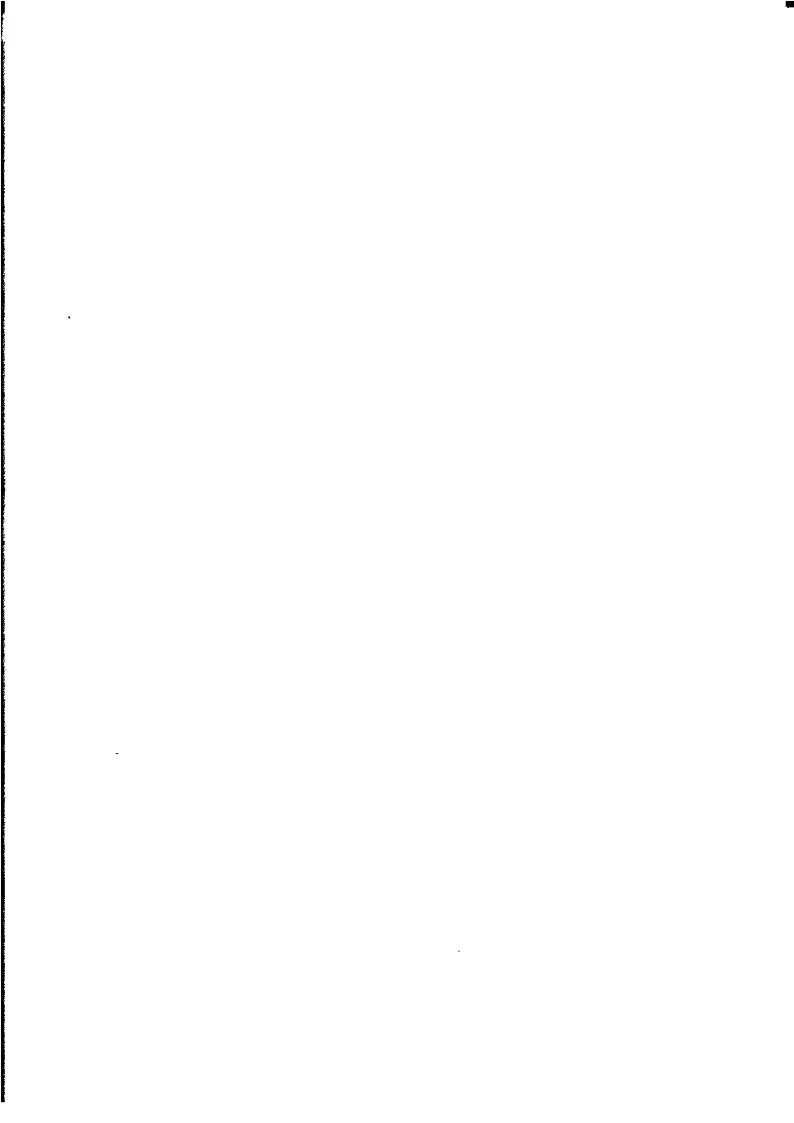

In original terms, the estimate of retail turnover in August 1995, for Tasmania, was \$230.5 million, more than 4% higher than the figure recorded for August 1994 (\$220.8 million).

(See table 35, page 24.)

NEW MOTOR VEHICLE REGISTRATIONS

There were 1,269 new motor vehicles (excluding motorcycles) registered in Tasmania during August 1995. This was more than 23% above the 1,029 registered in July 1995 but more than 4% below the figure for August 1994 (1,331).

(See table 34, page 24.)

Further information on construction of CPI indexes is contained in the bulletin *The Australian Consumer Price Index Concepts, Sources and Methods* (catalogue no. 6461.0).

The CPI is now published on a reference base of 1989–90 = 100.0.

Series from and including March 1989 has been affected by the change in treatment of mortgage interest charges.

includes the whole milk equivalent of farm cream intake.

includes butter equivalent of butter oil.

Excludes production of directory newsprint and high grade specialty paper.

Source: Australian Dairy Corporation.

Changing productivity per staff-hour makes these indicators unsatisfactory for long-term compansons.

Metallurgical refining index (Base: 1979–80 = 100.0) Output from selected establishments covering the smelting and refining of ferro-alloys, zinc and aluminium. The weighting pattern is based on the establishments' value added as derived from the 1979–80 Manufacturing Census. For multi-product establishments, value added was apportioned to products on the basis of gross receipts from each product.

Includes spinning, weaving and carpet making. Reported by establishments which manufacture textiles only, or manufacture clothing and textiles in the

### TOTAL PASSENGER ARRIVALS BY AIR AND SEA INTO TASMANIA

		Seasonally	
Period	Original	adjusted ¹	Trend
<b>1994</b> June	60 533	72 090	74 263
1995 April May June	76 847 62 009 65 035	70 337 79 223 78 490	77 000 77 098 77 550

There is an annual recalculation of seasonal adjustment factors to include the most recent year's arrivals. This occurs at the end of each financial year and may cause revisions to previously published seasonally adjusted and trend figures. A full time senes of seasonally adjusted and trend senes from January 1971 is available on request, telephone (002) 20 5870.

The proportion of departing passengers who were visitors was shown to be about 58% in the 1981 Tasmanian Visitor Survey, 55% in the 1984 Tasmanian Visitor Survey, about 53% in the 1986 Tasmanian Visitor Survey, almost 65% in the 1990 Tasmanian Visitor Survey, and almost 60% in

#### EXPLANATORY NOTES

#### INTRODUCTION

1 This publication contains latest figures for a comprehensive range of economic indicators. Statistics shown in this publication are the latest available at the date of preparation and may be subject to revision in subsequent issues. In a number of cases figures appearing in this publication are preliminary and are subject to revision in subsequent issues. Reference should therefore always be made to the latest issue or to the statistical publication on the specific subject.

### SEASONAL ADJUSTMENT AND TREND ESTIMATION

- 2 Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation from the series so that the effects of other influences on the series can be more clearly recognised. Seasonal adjustment does not aim to remove the irregular or non-seasonal influences which may be present in any particular month. This means that month-to-month movements of the seasonally adjusted estimates may not be reliable indicators of trend behaviour.
- 3 The smoothing of seasonally adjusted series reduces the impact of the irregular components of the seasonally adjusted series and creates trend estimates. These trend estimates are derived by applying a 13-term Henderson-weighted moving average to all months except the last six. The last six monthly trend estimates are obtained by applying surrogates of the Henderson average to the seasonally adjusted series. Trend series are used to analyse the underlying behaviour of the series over time.
- 4 While this smoothing technique enables estimates to be produced for the latest month, it does result in revisions to the most recent months as additional observations become available. Generally, subsequent revisions become smaller and after 3 months have a negligible impact on the series. Revisions also occur as a result of the annual review of seasonal factors.
- 5 Users may wish to refer to the ABS Publication A Guide to Interpreting Time Series - Monitoring 'Trends' + An Overview (1348.0) for more detailed information on smoothing seasonally adjusted time series data.

#### RELATED PUBLICATIONS

**6** Current publications produced by the ABS are listed in the *Catalogue* of Publications and Products (1101.0). The ABS also issues, on Tuesdays and Fridays, the Release Advice (1105.0) which lists publications to be released in the next few days. The Catalogue and Release Advice are available from any ABS office.

#### UNPUBLISHED STATISTICS

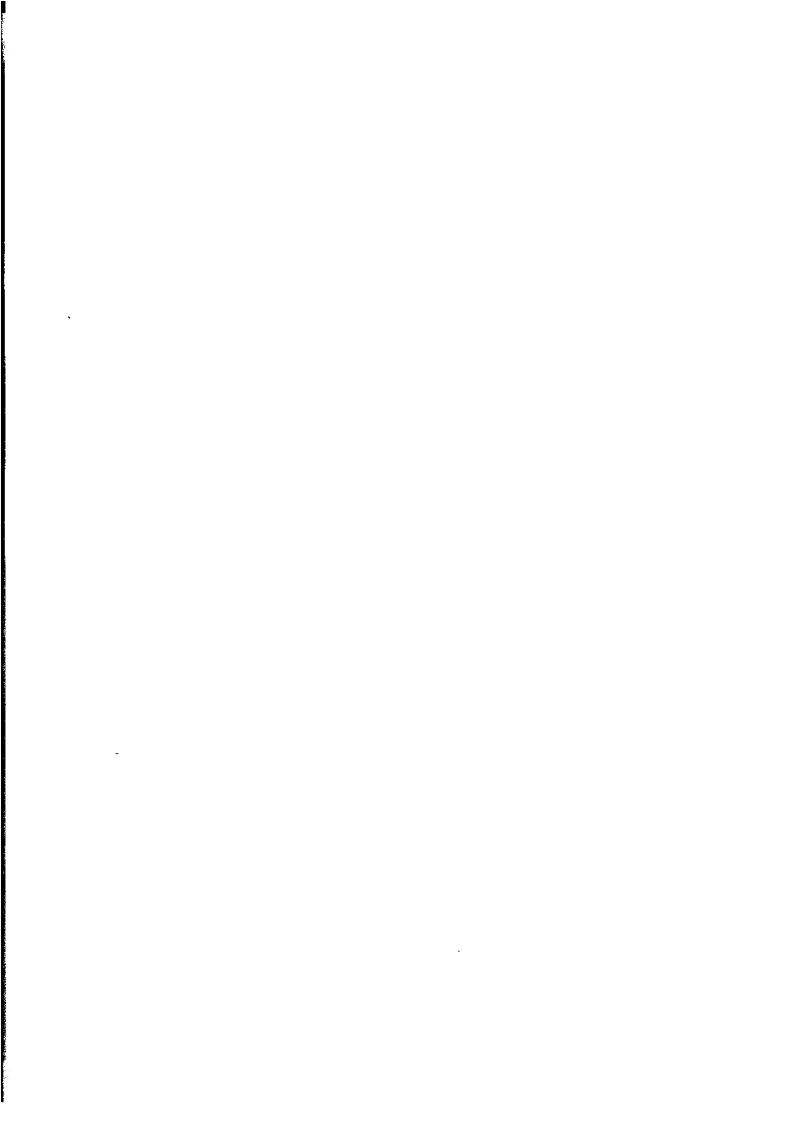

7 As well as the statistics included in this and related publications, the ABS may have other relevant unpublished data available. Inquiries should be made to Information Inquiries on (002) 20 5800 or to any ABS office.

#### EFFECTS OF ROUNDING

8 Some figures have been rounded and discrepancies may occur between totals and sums of the component items.

#### SYMBOLS AND OTHER USAGES

not available n.a. not yet available n.y.a. not applicable nil or rounded to zero р preliminary—figure or series subject to revision figure or series revised since previous issue
